

Jabez Magomere

jabezmagomere@gmail.com | [LinkedIn](#) | [Github](#) | [Google Scholar](#)

EDUCATION

University of Oxford

DPhil in Social Data Science

October. 2023 – Present

- **Area:** Factuality & Grounding of LLMs
- **Advisor:** [Dr Scott A. Hale](#)

University of Oxford

MSc in Social Data Science

MSc Grade: Distinction

October. 2022 – August 2023

- **Thesis:** Scaling Crowdsourced Election Monitoring: Construction and Evaluation of Classification Models for Multilingual Election Reports and Cross-Domain Classification Settings (**Distinction**)

Strathmore University

BSc in Computer Science

GPA: 3.95/4.0

Jan. 2016 – Dec. 2019

- Summa cum laude.
- **Thesis:** Deep Knowledge Tracing using Long Short-Term Memory (LSTM) networks for personalized learning in online environments.

RESEARCH & WORK EXPERIENCE

Student Researcher

Google DeepMind

Oct. 2025 – Jan. 2026

London, United Kingdom

- Agentic student simulators for learning environments.

AI Research Intern

JPMorganChase

June. 2025 – Oct. 2025

London, United Kingdom

- Reinforcement learning for complex claim decomposition in long-form factuality verification.

AI Research Intern

JPMorganChase

June. 2024 – December 2024

London, United Kingdom

- Synthetic data generation frameworks for specialised domains

NLP Research Assistant

Department of Economics, University of Oxford

June. 2023 – June 2024

Oxford, United Kingdom

- Clustering approaches for unstructured text.

OxAI Labs Researcher

Oxford Artificial Intelligence Society

Nov. 2023 – December 2024

Oxford, United Kingdom

- Co-designed and co-developed the [WorldWideDishes](#) data collection platform.
- Conducted evaluations of bias in Text-to-Image (T2I) systems.

Software Engineer

Twiga Foods

Jan. 2020 – November 2022

Nairobi, Kenya

- Developed [Android application](#) features, contributing to +10k downloads.
- Led the adoption of Kotlin and Go for backend services by designing and implementing 2 microservices, supporting over 1 million monthly payment and notification transactions.
- Created and ran a mentorship program for software engineering interns; mentored 4 interns through technical and professional development.

- Built and shipped features for the [Android application](#).
- Introduced unit and instrumentation testing, improving Android codebase test coverage by 12%.

HONORS & AWARDS

- Awarded Rhodes Scholarship 2022.
- Awarded the Best Overall Undergraduate Student in the School of Computing and Engineering Sciences in 2020.
- Dean's List Academic Award - 2017, 2018, 2019

TUTORING & MENTORING

- Volunteering to develop the LLM practical and tutorial at [Deep Learning Indaba 2025](#).
- Led the [Foundations of LLMs Practical](#) at Deep Learning Indaba 2024.

TALKS

- Presented a talk on [Knowledge Distillation in LLMs](#) at Reasoning with Machines lab at Oxford.
- Presented a talk on [Mixture of Experts](#) at Reasoning with Machines lab at Oxford.
- Presented a talk on [Robustness of Embedding Models](#) at OxNLP seminar.
- Presented a talk on [Easy Backends for Android Developers with Ktor](#) at Droidcon Nigeria 2021.
- Delivered a hands-on workshop on [Concurrency and Kotlin Coroutines](#) at Kotlin Everywhere Study Jam Nairobi 2019.
- Presented a talk on [A Guide to Unit Testing Architecture Components](#) at Droidcon Kenya 2019.
- Delivered a talk on [Introduction to Asynchronous Programming with Kotlin Coroutines](#) at Google IO Extended 2019 Nairobi.

PROJECTS & HACKATHONS

Visual Diagnoser

March. 2019

iLab Africa

Lead Android Developer

- Led the development of an android application to enable home-based diagnosis of diabetic retinopathy through image recognition.
- Trained a CNN model using **TensorFlow** to classify a retina image for diabetic retinopathy and deployed the model to low-end mobile devices to work in constrained networks using **TensorFlow Lite**.

Ms Maji

Feb. 2018

IBM Research Kenya

- Led a team to develop an [IoT-based water management system](#) be installed in densely populated to address gaps in water security. Built using Arduino MEGA2560 and IBM Watson IoT platform. This project was awarded the **Most Innovative Solution** at IBM Water Hackathon 2018

TECHNICAL SKILLS

- **Programming:** Python, Kotlin, Go, Java
- **Libraries:** PyTorch, TensorFlow, Keras, NumPy, Pandas, Scikit-learn, Seaborn.
- **Technologies:** Android, GraphQL, Redis, Docker, Git, Jacoco, CockroachDB, Kubernetes, PostgreSQL, Heroku, Firebase, SpringBoot, Ktor.
